

**Need an in-depth, one-on-one  
consultation with a QuickBooks  
integration expert?**

Then let's get started with my "Exploring" package, which is \$2,500 USD\*.

What does your business get exactly?

In essence it is a road-mapping session where I gather your integration desires from chats, white-boarding, screen-sharing sessions, etcetera. Next, I produce a PDF (and perhaps a video as well) deliverable that will detail that integration. This deliverable can be taken to any independent consultant or used by the internal development team. You will also receive a break down on the integration's total cost and implementation time.

This approach is a great way to \*save\* money by tapping my expertise before starting the integration and thus:

- Avoiding common integration pitfalls and time sinks;
- Understand the integration complexities (or lack there of);
- Starting with "best practices" and not learning them after the fact.

\* **100% money back guarantee** if your business is not satisfied.
